PROFILE SUMMARY

- Aspiring Backend Engineer skilled in Spring Boot, Microservices, and REST APIs, with real-world AI exposure through an LLM post-training internship at Ethara AI.
- Hands-on builder of production-grade systems using Kafka, Docker, and Gemini API, backed by 550+ DSA problems solved across LeetCode and Code360.

TECHNICAL SKILLS

- Languages:** Java
- Frameworks & Libraries:** Spring Boot, Spring Cloud Gateway, Microservices, JPA/Hibernate, WebClient, React
- Databases:** MySQL, PostgreSQL, MongoDB
- Messaging & Security:** Apache Kafka, Keycloak
- Tools & Platforms:** Docker, Postman, Insomnia, Git, Selenium
- AI & APIs:** Google Gemini API, LLM Post-Training, Data Annotation & Evaluation
- Core Concepts:** Data Structures & Algorithms, REST API Design, Microservices Architecture

EDUCATION

- Institute of Aeronautical Engineering, Hyderabad** May 2026
B.Tech in Computer Science and Engineering (AI & ML) GPA: 7.92/10

EXPERIENCE

- LLM Post Training Intern – Ethara AI** Jan 2026 – Apr 2026
Remote
 - Contributed to LLM post-training pipelines across data annotation, model evaluation, and response quality improvement, assessing 100+ evaluation tasks for correctness, coherence, and human alignment.
 - Conducted systematic error analysis and feedback iterations in collaboration with Quality Leads, directly improving LLM response accuracy and reliability across multiple model versions.

PROJECTS

- Hospital Management System (Backend)** Apr 2026
Spring Boot, REST APIs, JPA/Hibernate, Docker [GitHub](#) | [Live Demo](#)
 - Built a scalable Spring Boot backend handling 4+ core modules (patients, doctors, appointments, billing) with RESTful Client-Server architecture, connected to frontend via CORS.
 - Designed and implemented 10+ RESTful APIs supporting full CRUD operations and complex business logic.
 - Containerized the application using Docker, reducing environment setup time by 40% and ensuring consistent deployments.
- PulseFit – Microservices-Based Fitness Tracking Platform** Feb 2026
Spring Boot, Spring Cloud Gateway, Kafka, Keycloak, React, MongoDB, PostgreSQL, Docker [GitHub](#)
 - Architected a 5+ microservices backend with Spring Cloud Gateway, enabling independent scaling and modular deployment.
 - Secured the platform using Keycloak, implementing role-based access control across all services.
 - Built event-driven communication via Kafka, reducing inter-service coupling and enabling real-time fitness data processing.
- MoodFlix – AI Movie Recommendation System (Backend)** Dec 2025
Spring Boot, Gemini API, WebClient, PostgreSQL, JPA/Hibernate [GitHub](#) | [Live Demo](#)
 - Integrated Google Gemini API into a Spring Boot backend to deliver personalized movie recommendations based on user mood and interaction history.
 - Designed 8+ RESTful APIs with a clean 3-layer architecture (Controller, Service, Repository) and DTO mapping for efficient data transfer.
 - Achieved 90%+ workflow coverage through Selenium-based end-to-end API testing, ensuring system reliability and reducing bugs.

CERTIFICATIONS

- Java Full Stack – Wipro ([Link](#)) Oct 2025
- AI Foundations Associate – Oracle ([Link](#)) Apr 2025
- Agentforce Specialist – Salesforce ([Link](#)) Mar 2025

CODING PROFILES

- Code360:** 300+ problems solved
- LeetCode:** 250+ problems solved – 50-Day Badge
